

InterLake Media

Your Internet TV Solution Provider

InterLake Media delivers an end-to-end service for Internet TV Solutions. Learn why hundreds of customers in over 30 countries trust in us when it comes to online media distribution.

For more than 11 years our worldwide content delivery network provides high quality service with an availability of more than 99,98%. To support media distribution, InterLake Media offers publishing, distribution, syndication and IT integration services. We make it easy to monetize your content as it's distributed with support of advertising and payment. All of these services use a delivery infrastructure that makes the distribution of content to consumers fast and seamless.

Media Delivery Network for browser-based WebTV and IPTV Set-top-Boxes

A highly available and easy to use global media delivery platform to deliver your content in perfect quality. Features include Live & On-Demand Streaming in all formats, including delivery in Flash H.264 and Silverlight as well as distribution for Broadcast Quality Content and HD Streaming. Try our scalable platform now: Start small and cost-efficient and scale to massive volume later.

White Label Internet TV Platform

The Internet TV Platform MXclips ist the best solution for your VoD Project. Our platform easily plugs into your existing website. Publish, manage and syndicate your content. Features include: Multiple channel platform for Live & On-Demand content, Flash H.264 & Silverlight compatible, content syndication to other websites, WM9 & Flash DRM, GeoIP restriction, payment. Our platform connects to any CMS, Web-Application and Media Asset Management System.

HD Internet Streaming

Use our transcoding system and media delivery network to stream your content in HD quality over the internet. H.264, Flash, WinMedia and Silverlight High Definition optimized content delivery from as little as 1 MBit/s streaming bitrate. Check the MoreMX.com homepage for an example.

Flash DRM

The first fully featured Flash DRM solution. Protect your Flash and H.264 content with GeoIP restriction, delivery limitation to certain domains and to certain players, hidden RTMP paths, encrypted streaming, time-limited content access, no downloads or browser-caching.

Video Search

Our video and audio analysis technology literally watches and listens to media content and indexes a full-text categorized media index for your content. Use our video search for content archives, media clipping or for keyword-triggered advertising.

Media Transcoding

The best solution for automatic file conversion of all major video formats. Includes XML handling of Meta information, process monitoring and reporting. Optional instant replication to our delivery network and integration into your CMS or Media Asset Management System.

Broadcast Logger

The XBL-Broadcast Logger records multiple Video and Audio sources, TV/Radio stations or web streams simultaneously. The archived content can later be accessed easily by time and date or by full text search for live replay, configuration and administration via an internet browser.

Use the MXclips white label Internet TV platform to deliver amazing broadband video experiences that engage your users and also create additional real estate for advertisers in the digital space.

Protect and encrypt Flash Video content for streaming and deliver downloadable H.264 content that expires.

The InterLake Media portfolio is extended by a number of additional services:

Adobe Flash Media Interactive Server Hosting

We're running your interactive FMIS media applications on Shared and Dedicated Servers. Our experts have always been at the forefront of Adobe developments, having managed the Adobe Server Community Central Europe for over five years. Host Flash Media Server with the experts.

Online Advertising Solutions

Make your streams pay. Our modular advertising solution offers many ways to monetize your content: Preroll video ad inclusion, Layover ads with individual timing, automatic clip conversion, individual click tracking and reporting, XML API for existing ad-servers and much more. Talk to us for details.

Special Rich Media Solutions

When it comes to integrating and running Video E-Mail, Web-Conferencing, Video Ads for Radio streams, Online Presentations with video and slides as well as any other exotic solution, we're there to make it work. And there are more possibilities than you would think!

Process Integration and Consulting

You need it different? Or you need advice? We make it work! InterLake Media helps you with your concept and integrates any online video solution into your existing workflows, CMS, Media Asset Management system, Web-application and payment process. Contact us to see how we can assist you with your media delivery project.

The InterLake Media Service

InterLake is serving online customers since 1997 as an owner operated IT services company. We're based in Germany and the US with sales partners in six countries and currently serve customers in over 30 countries. We are operating a wide range of media applications and web installations from our own global media delivery network to web server clusters with many millions of page views per month. For online connectivity we operate our own server racks in data centers worldwide with an external connectivity of over 50 GBit/s.
